QUESTION ONE (20 MARKS)

Using Microsoft Word, produce a document as shown below;

PUT DOWN THE NEGATIVITY

When I first watched this video, as the professor poured the water into a glass, I expected him to ask the typical “glass half empty or glass half full” question. Instead, the professor asked, “How heavy is this glass of water?” Students shouted out answers ranging from eight ounces to sixteen ounces. He replied, “The absolute weight of this glass doesn’t matter. It all depends on how long I hold it. If I hold it for a minute or two, it’s fairly light. If I hold it for an hour straight, its weight might make my arm ache a little. If I hold it for a day straight, my arm will likely cramp up and feel completely numb and paralyzed, forcing me to drop the glass to the floor. In each case, the weight of the glass doesn’t change, but the longer I hold it, the heavier it feels to me.”

As the class shook their heads in agreement, he continued, “Your stresses and worries in life are very much like this glass of water. Think about them for a while and nothing happens. Think about them a bit longer and you begin to ache a little. **Think about them all day long, and you will feel completely numb and paralyzed — incapable of doing anything else until you drop them.**”

Moral: It's important to remember to let go of your stresses and worries. Live life!

QUESTION THREE (20 MARKS)

Using Microsoft Word, produce a document as shown below;

CULTIVATE A BURNING DESIRE BACKED BY FAITH.

Once a young man asked the wise man, Socrates, the secret to success. Socrates patiently listened to the man's question and told him to meet him near the river the next morning for the answer. The next morning Socrates asked the young man to walk with him towards the river. As they went in the river the water got up to their neck. But to the young man's surprise, Socrates ducked him into the water.

The young man struggled to get out of the water, but Socrates was strong and kept him there until the boy started turning blue. Socrates pulled the man's head out of the water. The young man gasps and took a deep breath of air. Socrates asked, 'What did you want the most when your head was in the water?' The young man replied, 'Air.' Socrates said, "**That is the secret to success.** When you want success as badly as you wanted the air while you were in the water, then you will get it. There is no other secret."

Moral: A burning desire is the starting point of all accomplishment. Just like a small fire cannot give much heat, a weak desire cannot produce great results.
